INTRODUCTION

I am a 400-level Computer Science student at the Federal University of Technology, Akure, with hands-on experience in frontend web development and interactive application design. Over the past year I have built and deployed multiple web projects — including browser-based games and productivity tools — using modern technologies such as JavaScript, React, and Tailwind CSS. I am driven to contribute to technology-focused teams where I can apply my skills, grow as a software engineer, and deliver scalable, user-focused web solutions.

SIWES INFORMATION

Institution: Federal University of Technology, Akure
Current Level: 400
Degree: B.Tech Computer Science (Degree in View)
SIWES Duration: 30th April – 30th September 2025

EDUCATION

BTech in Computer Science 2022 – Present
Federal University of Technology Akure
Computer Science

PROFESSIONAL EXPERIENCE

Frontend Developer 2024 – Present
(Independent & Freelance Projects)

- Designed and built browser-based games and web applications independently using HTML, CSS, JavaScript, React, and Tailwind CSS.
- Deployed all projects to production using Vercel, making them publicly accessible and functional on the web.
- Implemented interactive UI features including game loops, state management, real-time rendering, and responsive layouts.
- Practised iterative development by debugging issues, improving performance, and refining user experience across multiple projects.
- Used Git for version control throughout all projects, maintaining clean commit history and project organisation.

ACHIEVEMENTS

- Built and deployed web applications and games using modern frontend technologies including React, JavaScript, and Tailwind CSS.
- Launched all personal projects live on the web via Vercel, demonstrating the ability to take a product from concept to production.
- Developed strong debugging, state management, and UI-building skills through consistent hands-on project work.
- Maintained strong academic progress as a 400-level Computer Science student while building a technical portfolio in parallel.

PROJECTS

- 2048 Game – Number puzzle game
  - https://2048-eight-indol.vercel.app/

  Stack: HTML, JavaScript, Tailwind CSS
- EatEasy – Food discovery web application
  - https://eat-easy-psi.vercel.app/

  Stack: React, Tailwind CSS
- Guess Game – Interactive number guessing game
  - https://react-work-theta.vercel.app/

  Stack: React, Tailwind CSS
- Tic-Tac-Toe – Two-player XO game with win detection
  - https://xo-one-zeta.vercel.app/

  Stack: HTML, JavaScript, Tailwind CSS
- Travel Advisor – Travel planning and recommendation platform
  - https://travel-advisor-ebon.vercel.app/

  Stack: React, Tailwind CSS, shadcn/ui

SKILLS

Hard Skills: JavaScript, HTML, CSS, Tailwind CSS, React, Git, DOM Manipulation, Responsive Design, Vercel Deployment

Soft Skills: Problem Solving, Critical Thinking, Adaptability, Attention to Detail, Self-Directed Learning, Ability to Work Under Pressure

INTERESTS

- Frontend web development and modern JavaScript frameworks
- Browser-based game development and interactive UI design
- Building and deploying real-world web applications
- Open-source software and developer communities
- UI design and component-based architectures
